1) Introduction

_Advertisements_admin is a script that comes with the game you purchased, which will allow you to handle the in-game ads.

Remember that you'll need to create a banner on "AdMob" website and copy the ID

2) Instalation

- Drag the file "Advertisements" (inside AdMob folder) to the proyect scene.
- Select the object and it'll show this on the inspector:

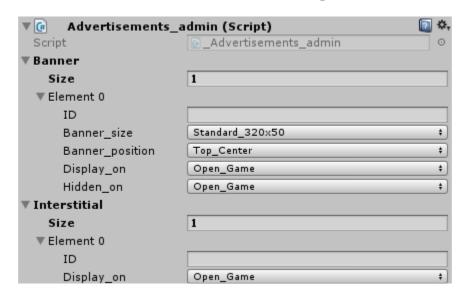

Select your option and click.

Once this is done, it reimports the Assets folder:
